europa universalis iv guns drums and steel music pack

Amazing, ok maybe it doesn't quite fit the setting, but its awesome during wars, however does lead to reckless acts.. When I first started my game with this music DLC installed...

I had an orgasm. The best EU4 music DLC, imho, so far.. Oh yeah! The game went from awesome to SUPER awesome with this addition. Let me demonstrate:

You have formed Prussia as Teutonic Order. It is time to teach the Polish the true meaning of Prussian discipline. When these tracks start playing as you declare war, they have already lost...

So, 5/5. Purely awesomeness to an awesome game.. Not a fan. This isn't really what i want when i play EU IV. Somehow the guitar in there just feels wrong with renaissance and age of exploration. I will be disabling this one.. Great music, low price.. I like the songs, but holy crap does this not fit into the feel of EU4... ruins the experience. OH doesn't fit at all, oh what have I done?!

O p t i o n a l

Listen to it on youtube and decide whether you should buy it or not, jesus you guys play grand strategy not modern military shooters, you should know better.

It is a really good read/watch, and I'd recommend that any history buffs who have somehow missed it, give it a look.

[The music pack is pretty good as well.](#)

[. Heavy metal. I like it. It's not for everyone though.](#)

This music DLC will make you want to attack everyone!. Excellent for when your fighting wars, makes them feel more like an epic clash. Reminds me of how in JRPGs final bosses would often have out of theme music associated with them, something I personally love but not for everyone. Also gets you more excited for the game as it loads.

Would buy more music tracks in this style, especially ones which trigger in war.. I absolutely love this music pack. The main theme is incredible and gave me the feeling that stuff was about to get real. I highly recommend this to fans of metal. Now to all the complainers and haters. It is quite obvious that this is a METAL music pack. It says so right in the description. Obviously metal music would not fit into a 1444-1821 scenario, so if you didn't want to break the "immersion" or "feel" of the game, then you probably shouldn't have bought this. So learn to read before you buy and stfu. \m/ Rock on Paradox. You rule!. Metal and strategy seem to mesh very well, and makes you feel even more confident and badass when you go to war.. It even more expensive than a model pack, but it worth.
